# GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2004 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

## SUMMARY OF GRAPE TONNAGES AND PRICES

The 2004 crush totaled 3,615,231 tons, up 7 percent from the 2003 crush of 3,370,121 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,638,658 tons, virtually unchanged from 2003. The 2004 white wine variety crush totaled 1,136,236 tons, down 8 percent from 2003. Tons crushed of raisin type varieties totaled 726,946, up 72 percent from 2003, while tons crushed of table type varieties totaled 113,391, up 35 percent from 2003. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2004 season, this total was 658,048 tons, approximately 18 percent of the 2004 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2004 for raisin, table, and white and red grapes that were, on average, above the 2003 prices. The 2004 average price of all varieties was \$482.26, up 2 percent from 2003. Average prices for the 2004 crop by type were as follows: red wine grapes, \$626.69, up 3 percent from 2003; white wine grapes, \$487.47, up 14 percent from 2003; raisin grapes, \$199.86, up 110 percent; and table grapes, \$198.52, up 117 percent. These price levels have not been adjusted for inflation.

## LEADING GRAPE VARIETIES AND DISTRICTS

In 2004, Thompson Seedless accounted for the largest percentage of crush volume with 19 percent. Chardonnay accounted for the second leading percentage of crush with 15 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties.

Grapes produced in District 4 (Napa County) received the highest average price of \$2,935.77 per ton, down 4 percent from 2003. District 3 (Sonoma and Marin counties) received the second highest return of \$1,869.14, down 4 percent from 2003. The 2004 Chardonnay price of \$693.77 was up 4 percent from 2003, while the 2004 Cabernet Sauvignon price of \$977.71 was down 3 percent from 2003. The 2004 average price for Merlot was \$799.34, virtually unchanged from 2003, while the Zinfandel average price of \$473.47 was up 11 percent from 2003.

## EXPLANATION OF TABLES

**TABLE 1** is a summary of the 2004 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2003 are shown for comparison.

**TABLE 2** includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2004 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2003 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

**TABLE 3** shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2004 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2003 are shown for comparison.

**TABLE 4** includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2004 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2003 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**TABLE 5** shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2004 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2003 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**TABLE 6** gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2004 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2003 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2005 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

DATA PAGE																				
IDENTIFICATION				SECTION I			SECTION II													
				Total Grapes Crushed At Your Facility			Final Prices Of Grapes Purchased From Grower(s) For Wine, Concentrate, Juice, Vinegar And Beverage Brandy													
							Purchased Tons Only		Wtd. Avg. Degrees Brix	Total Brix (Col. 5 X Col. 7)	Base Price Per Ton	Acceptable Brix Limits		Brix Adjustment Factors Per Degrees Brix Per Ton Plus & Minus	Office Use	Brix Adjustment Limits			Wtd. Avg. Price Per Ton	Total Paid (Col. 5 x Col. 16)
All Purchased Tons	Non-Related Purchased Tons	Min.	Max.	Base	Min.	Max.														
VARIETY (List full name)	Dist. Where Grown	Code	Line	Over The Scale Tons	Wtd. Avg. Degrees Brix	Total Brix (Col. 3 X Col. 4)	5	8	4	6	1	9	10	11	10	13	10	10	16	C
Petite Sirah	1		2	155.5	20.6	3,203.3	100.0	100.0	20.1	2,010.0	450.0	20.0	25.0	+ or - 10%		20.0	20.0	20.0	364.50	36,450.00
Petite Sirah	1			20.5	19.0	389.5	20.5	20.5	19.0	389.5	450.0	20.0	20.0	+ or - 10%		20.0	20.0	20.0	418.50	8,579.25
Petite Sirah	1			10.6	23.5	249.1	10.6	10.6	23.5	249.1	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	517.50	5,485.50
Combined				186.6	20.6	3,841.9	131.1	131.1	20.2	2,648.6	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	385.31	50,514.75

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 7 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 16 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

**TABLE 7** shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2004 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2003 are given for comparison.

**TABLE 8** shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

**TABLE 9** includes tonnage of all grapes crushed to growers' accounts by California processors from the 2004 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2003 are shown. (**Table 9 only appears in the Final Grape Crush Report.**)

**TABLE 10** gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2004 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2003 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**Non-Related Purchased Tons:** Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

#### Synonyms for Grape Variety Names

(First synonym listed was used for this publication.)

Alicante Bouschet * – Alicante	Malvasia Bianca * – Vennentino, Vermintino	Red Globe * – Rose Ito
Beauty Seedless * – Black Beauty	Marechal Foch * – Foch	Refosco * – Mondeuse
Black Pnnc * – Rose of Peru	Mataro * – Mourvedre	Rubired * – Tintoria
Blaufraenkisch * – Lemberger	Meunier * – Pinot Meunier	Ruby Seedless * – King Ruby
Burger * – Monbadon	Moscato Gaillo * – Muscat Yellow	Sangiovese * – Sangioveseto, Brunello
Chardonnay * – Pinot Chardonnay	Muscat Blanc * – Muscat Canelli,	Sauvignon Vert * – Muscadelle
Cinsaut * – Black Malvoisie, Black Malvasia	Muscat Blanc A Petits Grains	St. Emilion * – Ugni Blanc, Trebbiano
Emerald Seedless * – Black Seedless	Muscat Hamburg * – Black Muscat	Syrah * – French Syrah, Shiraz, Syrah Noir
Flame Seedless * – Red Flame	Negrette * – Pinot St. George	Tempranillo * – Tinta Ronz, Valdepenas
Gamay (Napa) * – Gamay, Valdiguié	Nero D'Avola * – Calabrese	Touriga Nacional * – Touriga
Gray Riesling * – Trousseau Gris	Palomino * – Golden Chasselas	Trousseau * – Bastardo
Grenache * – Grenache Noir	Pinot Gris * – Pinot Grigio	White Riesling * – Johannisberg Riesling,
Italia * – Muscat Italia	Pnncess * – Melissa	Riesling
Malaga * – White Malaga	Red Cnmson * – Crimson Seedless

\* Synonyms for variety names are shown on Page 5.

a/ See code descriptions in Table 8-Supplement: 2004 Brix Adjustment Factors.

b/ Other categories include minor and mixed varieties.

TABLE 8 - SUPPLEMENT: 2004 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2004 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2004 BRIX ADJUSTMENT FACTORS

The following Brx adjustment factors are on a per degree Brx basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brx acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brx, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

## PUBLICATION AND SUBSCRIPTION REQUEST FORM

Complete the "publication request" if you would like to purchase one or more publications on a one-time basis only. We will mail you the latest release unless you indicate otherwise. When ordering diskettes, please be sure to check the appropriate file format.

Complete the "subscription request" if you would like to be placed on our regular mailing list for upcoming releases.

For all requests, check the publications you wish to receive, enter the amount in the space provided and total the cost of all fees. Please be sure to complete the "requested by" information.

Publications on this order form can be obtained free of charge at [www.nass.usda.gov/ca](http://www.nass.usda.gov/ca). Please forward any inquiries to our e-mail address at [nass-ca@nass.usda.gov](mailto:nass-ca@nass.usda.gov).

TO THE PERSON ADDRESSED:

The enclosed "June 2005 Errata to the Final Grape Crush Report, 2004 Crop" contains additional and revised data, which were derived from information received after the March 10, 2005 release of the final crush report.

If you have any questions about the errata, please contact Gary Nelson or Jennifer Van Court at (916) 498-5161, Agricultural Statistics Branch, California Department of Food and Agriculture, 650 Capitol Mall, Suite 6-100, Sacramento, California 95814.

Sincerely,

Kelly Krug, Director  
Marketing Services Division

## GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2005 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

### SUMMARY OF GRAPE TONNAGES AND PRICES

The 2005 crush totaled 4,328,840 tons, up 20 percent from the 2004 crush of 3,615,278 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 2,234,595 tons, up 36 percent from 2004. The 2005 white wine variety crush totaled 1,520,572 tons, up 34 percent from 2004. Tons crushed of raisin type varieties totaled 467,483, down 36 percent from 2004, while tons crushed of table type varieties totaled 106,190, down 6 percent from 2004. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2005 season, this total was 550,296 tons, approximately 13 percent of the 2005 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2005 for raisin and table grapes that were, on average, below the 2004 prices, while the prices received for red and white were, on average, above the 2004 prices. The 2005 average price of all varieties was \$532.78, up 10 percent from 2004. Average prices for the 2005 crop by type were as follows: red wine grapes, \$633.48, up 1 percent from 2004; white wine grapes, \$506.37, up 4 percent from 2004; raisin grapes, \$164.25, down 18 percent; and table grapes, \$121.36, down 39 percent. These price levels have not been adjusted for inflation.

## LEADING GRAPE VARIETIES AND DISTRICTS

In 2005, Chardonnay accounted for the largest percentage of crush volume with 17.1 percent. Cabernet Sauvignon accounted for the second leading percentage of crush with 12.5 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties, with the exception of Thompson Seedless.

Grapes produced in District 4 (Napa County) received the highest average price of \$2,990.23 per ton, up 2 percent from 2004. District 3 (Sonoma and Marin counties) received the second highest return of \$1,871.23, virtually unchanged from 2004. The 2005 Chardonnay price of \$713.98 was up 3 percent from 2004, while the 2005 Cabernet Sauvignon price of \$938.12 was down 4 percent from 2004. The 2005 average price for Merlot was \$729.53, down 9 percent from 2004, while the Zinfandel average price of \$472.08 was down less than 1 percent from 2004.

## EXPLANATION OF TABLES

TABLE 1 is a summary of the 2005 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2004 are shown for comparison.

TABLE 2 includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2005 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2004 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

TABLE 3 shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2005 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2004 are shown for comparison.

TABLE 4 includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2005 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2004 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 5 shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2005 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2004 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

TABLE 6 gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2005 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2004 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2006 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The following example indicates the method used for calculating weighted averages:

IDENTIFICATION				DATA PAGE																
				SECTION I				SECTION II												
				Total Grapes Crushed At Your Facility				Final Prices Of Grapes Purchased From Grower(s) For Wine, Concentrate, Juice, Vinegar And Beverage Brandy												
VARIETY (List full name)	Dist. Where Grown	Code	Lins	Over The Scale Tons	Wtd. Avg. Degress Brx	Total Brx (Col. 3 X Col. 4)	Purchased Tons Only		Wtd. Avg. Pettis Sirah	1			20.5	19.0	389.5	20.5	20.5	19.0	190.0	459.0	19.0	25.0	+ or - 10%		20.0	20.0	20.0	418.50	8,579.25
Pettis Siran	1			10.6	23.5	249.1	10.6	10.6	23.5	249.0	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	517.50	5,485.50
Combined	1			186.6	20.6	3,841.9	131.1	131.1	20.2	2,648.6	450.0	19.0	25.0	+ or - 10%		22.0	20.0	24.0	385.31	50,514.75

Column 4 was obtained by dividing the total Over the Scale Tons (Column 3) into the Total Brix of these same tons (Column A):

$$\frac{3,841.9}{186.6} = 20.6$$

Column 7 was obtained by dividing the Purchased Tons Only (Column 5) into the Total Brix of these same tons (Column B):

$$\frac{2,648.6}{131.1} = 20.2$$

Column 16 was obtained by dividing the total Purchased Tons Only (Column 5) into the total dollars paid for these same tons (Column C):

$$\frac{\$50,514.75}{131.1} = \$385.31$$

**TABLE 7** shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2005 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2004 are given for comparison.

**TABLE 8** shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

**TABLE 9** includes tonnage of all grapes crushed to growers' accounts by California processors from the 2005 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2004 are shown. *(Table 9 only appears in the Final Grape Crush Report.)*

**TABLE 10** gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2005 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2004 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**Non-Related Purchased Tons:** Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

### Grape Variety Synonyms

Alicante Bouschet \* -- Alicante  
Beauty Seedless\* -- Black Beauty  
Blaufrankenisch \* -- Lemberger  
Burger \* -- Monbadon  
Chardonnay \* -- Pinot Chardonnay,  
Chardonnay Musque  
Cinsaut \* -- Black Malvoisie, Black Malvasia  
Crimson Seedless \* -- Red Crimson  
Emerald Seedless \* -- Black Seedless  
Flame Seedless \* -- Red Flame  
Gamay (Napa) \* -- Gamay, Valdiguie  
Gray Riesling \* -- Trousseau Gris  
Grenache \* -- Grenache Noir  
Italia \* -- Muscat Italia

Malaga \* -- White Malaga  
Malvasia Bianca \* -- Vennentino, Vermintino  
Marechal Foch \* -- Foch  
Mataro \* -- Mourvedre  
Meunier \* -- Pinot Meunier  
Moscato Gaillo \* -- Muscat Yellow  
Muscat Blanc \* -- Muscat Canelli,  
Muscat Blanc A Petits Grains  
Muscat Hamburg \* -- Black Muscat  
Negrette \* -- Pinot St. George  
Nero D'Avola \* -- Calabrese  
Palomino \* -- Golden Chasselas  
Pinot Gris \* -- Pinot Grigio  
Princess \* -- Melissa

Red Globe \* -- Rose Ito  
Refosco \* -- Mondeuse  
Rubired \* -- Tintona  
Ruby Seedless \* -- King Ruby  
Sangiovese \* -- Sangiovetto, Brunello  
Sauvignon Vert \* -- Muscadelle  
St. Emilion \* -- Ugni Blanc, Trebbiano  
Syrah \* -- French Syrah, Shiraz, Syrah Noir  
Tempranillo \* -- Tinta Roriz, Valdepenas  
Touriga Nacional \* -- Touriga  
Trousseau \* -- Bastardo  
White Riesling \* -- Johannisberg Riesling,  
Riesling

\* Synonyms for variety names are shown on Page 5.

a/ See code descriptions in Table 8 - Supplement. 2005 Brix Adjustment Factors.

b/ Other categories include minor and mixed varieties.

c/ Price basis per Degree Brix.

d/ Price per Degree Brix not included in weighted average base price.

TABLE 8 - SUPPLEMENT: 2005 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

TABLE 8 - SUPPLEMENT: 2005 BRIX ADJUSTMENT FACTORS

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

### PUBLICATION AND SUBSCRIPTION REQUEST FORM

Complete the "publication request" if you would like to purchase one or more publications on a one-time basis only. We will mail you the latest release unless you indicate otherwise. When ordering diskettes, please be sure to check the appropriate file format.

Complete the "subscription request" if you would like to be placed on our regular mailing list for upcoming releases.

For all requests, check the publications you wish to receive, enter the amount in the space provided, and total the cost of all fees. Please be sure to complete the "requested by" information.

Publications on this order form may be accessed free-of-charge at [www.nass.usda.gov/ca](http://www.nass.usda.gov/ca). Please forward any inquiries to our e-mail address at [nass-ca@nass.usda.gov](mailto:nass-ca@nass.usda.gov).

## TO THE PERSON ADDRESSED:

The enclosed "July 2006 Errata to the Final Grape Crush Report, 2005 Crop" contains additional and revised data, which were derived from information received after the March 10, 2006 release of the final crush report.

If you have any questions about the errata, please contact Doug Flohr or Jennifer Van Court at (916) 498-5161, Agricultural Statistics Branch, California Department of Food and Agriculture, 650 Capitol Mall, Suite 6-100, Sacramento, California 95814.

Sincerely,

A handwritten signature in black ink, reading "Kelly Krug".

Kelly Krug, Director  
Marketing Services Division

## GRAPE CRUSH REPORT OVERVIEW

Information contained in this Report was supplied by processors to fulfill the reporting requirements of Section 55601.5 of the Food and Agricultural Code.

The Final Grape Crush Report includes all grape tonnage crushed during the 2006 season. Changes in tonnage, Brix, and prices from the preliminary report to this final report were due to late reports, and corrections to the original data. Reporting errors by some processors have caused a change in some district/variety entries.

Details of the crushed tonnage, degrees Brix, and weighted average prices were reported by grape type and variety, as well as by grape pricing districts. The 17 districts refer to the area in which the grapes were grown as defined in the Administrative Code. A district map is located on the inside of the front cover.

### SUMMARY OF GRAPE TONNAGES AND PRICES

The 2006 crush totaled 3,488,988 tons, down 19 percent from the record 2005 crush of 4,330,064 tons. Red wine varieties accounted for the largest share of all grapes crushed, at 1,873,892 tons, down 16 percent from 2005. The 2006 white wine variety crush totaled 1,262,542 tons, down 17 percent from 2005. Tons crushed of raisin type varieties totaled 267,021, down 43 percent from 2005, while tons crushed of table type varieties totaled 85,533, down 19 percent from 2005. (See chart below.)

Beginning with the 1999 season, the Grape Crush Report includes the total number of tons crushed for concentrate production. In determining grape tonnage crushed for concentrate production, each processor was required to report the estimated equivalent tons of grapes crushed for grape concentrate. For the 2006 season, this total was 463,203 tons, approximately 13 percent of the 2006 grape crush total. This report provides only the aggregate figure for grapes crushed for concentrate production and does not include information by district, type, or variety.

California grape growers received prices in 2006 for raisin grapes and white wine grapes that were, on average, below the 2005 prices, while the prices received for table grapes and red wine grapes were, on average, above the 2005 prices. The 2006 average price of all varieties was \$548.42, up 3 percent from 2005. Average prices for the 2006 crop by type were as follows: red wine grapes, \$636.55, up only slightly from 2005; white wine grapes, \$503.56, down 1 percent from 2005; raisin grapes, \$153.79, down 6 percent; and table grapes, \$137.17, up 13 percent. These price levels have not been adjusted for inflation.

**LEADING GRAPE VARIETIES AND DISTRICTS**

In 2006, Chardonnay accounted for the largest percentage of crush volume with 15.7 percent. Cabernet Sauvignon accounted for the second leading percentage of crush with 12.1 percent of the total crush. The next eight highest percentages of grapes crushed were all wine varieties, with the exception of Thompson Seedless.

Grapes produced in District 4 (Napa County) received the highest average price of \$3,042.71 per ton, up 2 percent from 2005. District 3 (Sonoma and Marin counties) received the second highest return of \$1,990.74, up 6 percent from 2005. The 2006 Chardonnay price of \$752.87 was up 5 percent from 2005, while the 2006 Cabernet Sauvignon price of \$954.52 was up 2 percent from 2005. The 2006 average price for Zinfandel was \$509.65, up 8 percent from 2005, while the Merlot average price was down 9 percent from 2005 at \$664.07.

### Grape Crush, Dollars Per Ton

By Type, 1997-2006

Source: USDA, NASS, California Field Office

## EXPLANATION OF TABLES

**TABLE 1** is a summary of the 2006 crop State totals by grape type and varieties that are shown in detail by grape pricing districts in Tables 2 through 6. State totals and averages for 2005 are shown for comparison.

**TABLE 2** includes over-the-scale fresh tonnage of all grapes crushed by California processors from the 2006 crop. Over-the-scale fresh weight tonnage includes materials other than grapes (MOG) and defects. This table is broken down by the 17 grape pricing districts and by variety. State totals for 2005 are shown for comparison. Crushed tonnage includes all grapes crushed whether: grown and crushed by processors; purchased and crushed by processors; crushed by cooperatives, juice manufacturers, etc.; or crushed for others, including growers.

**TABLE 3** shows the weighted average degrees Brix for all grapes crushed (TABLE 2) by California processors from the 2006 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2005 are shown for comparison.

**TABLE 4** includes net weight fresh tonnage of all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy by California processors from the 2006 crop. Net weight fresh tonnage does not include material other than grapes (MOG) and defects or other weight adjustments deducted from gross weight. The purchased tonnage is reported by variety and grape pricing districts. State totals for 2005 are shown for comparison. TABLE 4 does not include tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices for all tonnage shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**TABLE 5** shows the weighted average degrees Brix for all grapes purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2006 crop. The weighted average degrees Brix is reported by grape pricing districts and variety. State averages for 2005 are shown for comparison. TABLE 5 does not include degrees Brix of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**TABLE 6** gives the weighted average price per ton, delivered basis, of all tonnage purchased for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2006 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2005 are shown for comparison. TABLE 6 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

Weighted average prices reflect final prices through January 10, 2007 and include any Brix adjustments, bonuses or allowances. Prices are equivalent to delivered basis in the area grown including normal within-area hauling allowances. Purchases made on a roadside basis include the usual hauling allowance for local delivery in the area grown. Out-of-area purchases made on a delivered basis do not include extra hauling allowances for delivery outside the area.

The next example indicates the method used for calculating weighted averages.

The following two purchases were made.

Variety	District	Tons	Degrees Brix	Base Price	Price Paid Per Ton	Acceptable Brix Limits	Brix Adjustment Factors	Brix Adjustment Limits
Petite Sirah	1	155.5	20.6	\$450.00	\$364.50	19 - 25	+ or - 10%	Base 22, Min 20, Max 24
Petite Sirah	1	20.5	19.0	\$450.00	\$418.50	19 - 25	+ or - 10%	Base 22, Min 20, Max 24

*Note: The variety, district, base price, and Brix Adjustment Factors (including Brix limits) are the same. The tons purchased, degrees Brix, and price paid per ton are the only differences in this example.*

**Step 1:** Multiply the tons by the Brix for each lot purchased and then add the products to get the total. Also, add the tons purchased.

Variety	District	Tons	Degrees Brix	Total (Tons X Brix)
Petite Sirah	1	155.5	20.6	155.5 X 20.6 = 3,203.3
Petite Sirah	1	20.5	19.0	20.5 X 19.0 = 389.5
<b>TOTALS</b>		<b>176.0</b>		<b>3,592.8</b>

**Step 2:** Divide the total (3,592.8) by the total tons purchased (176.0) to get the **Weighted Average Degrees Brix**.  $\frac{3,592.8}{176.0} = 20.4$

**Step 3:** Multiply the purchased tons by the Price Paid Per Ton for each lot purchased and then add the products to get the total.

Variety	District	Tons	Price Paid Per Ton	Total (Tons X Brix)
Petite Sirah	1	155.5	\$364.50	155.5 X 364.50 = 56,679.8
Petite Sirah	1	20.5	\$418.50	20.5 X 418.50 = 8,579.3
<b>TOTALS</b>		<b>176.0</b>		<b>65,259.1</b>

**Step 4:** Divide the total (65,259.1) by the total tons purchased (176.0) to get the **Weighted Average Price Per Ton**:  $\frac{65,259.1}{176.0} = \$370.79$

**TABLE 7** shows all grape tonnage purchased as distilling material other than beverage brandy by California processors from the 2006 crop. The tonnage, weighted average degrees Brix and price per ton are shown by grape type and variety. State totals and averages for 2005 are given for comparison.

**TABLE 8** shows base prices paid to growers by Brix adjustment factors, purchased tonnage, type, variety and reporting district where grown. Weighted average base prices and total purchased tonnage are included.

The Brix adjustment factors determine adjustments to base prices to compensate for sugar variations. In this report, adjustments are expressed in dollars per ton, or percent of base price per degree variance from the established Brix base. Occasional lots are traded on price per degree Brix as delivered.

**TABLE 9** includes tonnage of all grapes crushed to growers' accounts by California processors from the 2006 crop. Growers retained ownership of these grapes at the time of crushing. This tonnage is reported by grape pricing district and variety. Comparisons with 2005 are shown. (**Table 9 only appears in the Final Grape Crush Report.**)

**TABLE 10** gives the weighted average price per ton, delivered basis, of all tonnage purchased from non-related sources for wine, concentrate, juice, vinegar, and beverage brandy (TABLE 4) by California processors from the 2006 crop. The weighted average prices are reported by variety, and grape pricing districts. State averages for 2005 are shown for comparison. TABLE 10 does not include prices of tonnage purchased as distilling material other than beverage brandy, this is shown in TABLE 7. Prices shown in this table are final and not subject to change. Grapes pooled by cooperatives, those grown by processors and used for their own production and grapes crushed to growers' accounts are not included.

**Non-Related Purchased Tons:** Excludes tonnage of grapes purchased from a grower if:

- The grower or an affiliate of the grower, or both the grower and the affiliate of the grower, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the winery (processor);
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, owned, directly or indirectly, at least 5 percent of the indicia of ownership or voting authority of the grower;
- The winery (processor) or an affiliate of the winery, or both the winery and the affiliate of the winery, provided long-term financing to the grower in exchange for rights or options to purchase a significant portion of the grower's harvest.

### Grape Variety Synonyms

Alicante Bouschet – Alicante	Malvasia Bianca – Vennentino, Vermintino	Ribolla Gialla – Rebolla
Black Prince – Rose of Peru	Marechal Foch – Foch	Rubired – Tintoria
Blaufränkisch – Lemberger	Mataro – Mourvedre	Ruby Seedless – King Ruby
Burger – Monbadon	Meunier – Pinot Meunier	Sangiovese – Sangioveseto, Brunello
Chardonnay – Pinot Chardonnay,	Moscato Gaillo – Muscat Yellow	Sauvignon Vert – Muscadelle
Chardonnay Musque	Muscat Blanc – Muscat Canelli,	St. Emilion – Ugni Blanc, Trebbiano
Cinsaut – Black Malvoisie, Black Malvasia	Muscat Blanc A Petits Grains	Syrah – French Syrah, Shiraz, Syrah Noir
Crimson Seedless – Red Crimson	Muscat Hamburg – Black Muscat	Tempranillo – Tinta Roriz, Valdepenas
Emerald Seedless – Black Seedless	Negrette – Pinot St. George	Touriga Nacional – Touriga
Flame Seedless – Red Flame	Nero D'Avola – Calabrese	Trousseau – Bastardo
Gamay (Napa) – Gamay, Valdiguie	Palomino – Golden Chasselas	White Riesling – Johannisberg Riesling,
Gray Riesling – Trousseau Gris	Pinot Gris – Pinot Grigio	Riesling
Grenache – Grenache Noir	Princess – Melissa	Zinfandel – Primitivo
Italia – Muscat Italia	Red Globe – Rose Ito	
Malaga – White Malaga	Refosco – Mondeuse

\* Synonyms for variety names are shown on Page 5.

a/ See code descriptions in Table 8 - Supplement: 2006 Brix Adjustment Factors.

b/ Other categories include minor and mixed varieties.

c/ Price basis per Degree Brix.

d/ Price per Degree Brix not included in weighted average base price.

e/ All prices based on per Degree Brix.

**TABLE 8 - SUPPLEMENT: 2006 BRIX ADJUSTMENT FACTORS**

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.

**TABLE 8 - SUPPLEMENT: 2006 BRIX ADJUSTMENT FACTORS**

The following Brix adjustment factors are on a per degree Brix basis and are normally calculated to a tenth of a degree, and are cumulative unless otherwise indicated. Most processors, however, indicate maximum and/or minimum Brix acceptance limits. Grapes testing above or below these limits may be subject to price renegotiation, acceptance for use other than for table wine, or rejection by the processors. Discounts for high sugar apply to both base price and bonus unless otherwise stated. There are factors other than Brix, such as material other than grapes (MOG), defects, weight loss in late harvest grapes, and sugar/acid ratios that affect grape prices. These were not considered in this presentation, unless otherwise stated, but were considered in arriving at weighted average prices.
